PartsPeople began as a small company 18 years ago in an extra bedroom of my house. I had saved a small sum of money to purchase some computer parts and began selling them on eBay. After a few months I realized that people needed a place to go for Dell parts so I began building our website. Since we are located in Austin, Texas, where Dell.com was founded, I was able to set up a solid supply line with

Dell. From the start, we focused on customer satisfaction and selling quality parts.<http://dopuskvsro.ru/UserFiles/incorporated-associations-practice-manual.xml>

If your Dell laptop key is broken or missing, you have come to the right place for all resources to fix or repair your laptop keyboard key. Rather than spending hundreds of dollars on a new keyboard, Here, we will give a quick tutorial on how to replace the laptop key on your Dell Latitude D830. This is a supplemental guide in addition to the video installation instructions above on you to replace your Dell Latitude D830 keyboard key Typically, the small plastic feet on the plastic hinge

will be spaced appropriately for you to determine which direction the plastic parts go in relation to the metal hooks on the keyboard base. Observe the laptop key retainer clips carefully and notice that the smoother side will always face up, additionally, the plastic feet on the laptop keyboard key retainer clip will always face downward to allow the hinge to fit into the metal hooks. Once the retainer clip is situated correctly, lock it into the metal hooks on the keyboard base, it is always easier approaching it from one direction and hooking in the plastic clip than another. If one direction does not work, try the other. Now the laptop key retainer clip will be securely attached and ready to accept the plastic key top. If the laptop key is the type with the metal supporting bars, those will need to be inserted into the matching metal hooks as the laptop key cap slides over the plastic retainer clip and before it is pressed on. Once the keyboard key is positioned squarely over the retaining clip, press down gently until you hear a distinct click on all 4 corners. This indicates that the key cap has been secured to the retainer clip correctly. Pull up on all four corners gently to ensure that this happened correctly. Thats it! You have successfully completed a repair on an individual key for the Dell Latitude D830 laptop key. A You can purchase the replacement keyboard key kit [HERE](#) A Yes, replacing keyboard keys is cheap and easy to do.
